Guest: Deputy Head of Department for Research Søren Riis Paludan

Minute taker: HR Partner Pia Lind Lunau Kristensen

1. Forskningsevaluering/Research Evaluation - by Head of Department

Head of Department informed that an updated draft of the research evaluation report for this meeting was sent out, by HR, the 16th May and to be discussed at the meeting today.

Head of Department informed that the communication partner will help to finalize the layout of the report next week – the panel visit takes place in approx. a month. Head of Department is open for further discussion, but further changes will be difficult.

The committee thanked for being close to the process and found that the input from the last meeting has now been incorporated – good changes had been made since the last draft.

Head of Department confirmed that most of the input has been taken into account and he is therefore also satisfied with the result. There is not space enough for everything in the report – therefore Head of Department, and deputy Head of Department for Research and deputy Head of Department for Teaching will address further topics in the oral presentations at the Panel's visit in June.

The Committee acknowledged that the report now gives another impression of confidence – and that's great.

The Committee suggested a few extra corrections – Head of Department will look at what's possible to accommodate.

Head of Department thanked for input and look forward to the panel visit in June where the department is invited.
